### Executive summary

This document contains the dissemination activities of the project VICON of the last period. It contains all activities, exhibitions, conferences and publications made. The dissemination strategy was focused on presenting the project and its result to various interested communities and fora of science and industry, the dissemination activities will continue in the remaining period with increasing relevance. This deliverable (due date month 15) and the deliverable 6.6 Plan for Use and Dissemination of Foreground – 2<sup>nd</sup> Draft (due date month24) have due to the very similar topic some common parts. This is due to the fact that D6.2 was introduced in the project proposal and D6.6 was introduced as a standard deliverable during the negotiations. The concrete resulting actions (if any) and the partners responsible for execution of the actions are mentioned in the deliverable that is dedicated to the plans (D6.6). There also the innovations that were disseminated and to which extent the actions got impact are reported.

## 1 Introduction

This document gives an overview on the dissemination activities done by the Consortium of VICON till now. The following tables are included to this document:

- All scientific (peer reviewed) publications relating to the foreground of the project.
- All dissemination activities (publications, conferences, workshops, web sites/applications, press releases, flyers, articles published in the popular press, videos, media briefings, presentations, exhibitions, thesis, interviews, films, TV clips, posters).

## 2 Dissemination activities so far

### 2.1 List of peer reviewed scientific publications

| List of Scientific (peer reviewed) publications, starting with the most important ones   |   |                      |                                       |                           |                    |                      |                     |                |   |  |

| 1  | Supporting inclusive product design with virtual user models at the early stages of product development | Pierre Kirisci et al | ICED 2011                             | ISBN 978-1-904670-29-2    | The Design Society | Copenhagen           | 2011                | 80-90          | <a href="http://papers.designsociety.org/supporting_inclusive_product_design_with_virtual_user_models_at_the_early_stages_of_product_development.paper.30786.htm">http://papers.designsociety.org/supporting_inclusive_product_design_with_virtual_user_models_at_the_early_stages_of_product_development.paper.30786.htm</a> | Yes  |
| <p>ICED is a biennial conference, with a growing academic and industrial audience. The conference has its roots in engineering, but has radically broadened in scope, to a general understanding of designing as an activity, its human factors and knowledge aspects, its composed and multi-disciplinary</p> |   |                      |                                       |                           |                    |                      |                     |                |   |  |

<sup>1</sup> A permanent identifier should be a persistent link to the published version full text if open access or abstract if article is pay per view) or to the final manuscript accepted for publication (link to article in repository).

<sup>2</sup> Open Access is defined as free of charge access for anyone via Internet. Please answer "yes" if the open access to the publication is already established and also if the embargo period for open access is not yet over but you intend to establish open access afterwards.

nature, and its societal role and importance. Prof. Klaus-Dieter Thoben from the University of Bremen as one of the authors of the paper presented the the outline of the paper in one the workshop sessions. There was also a poster presentation of the VICON project. There was a fruitful discussion with the audience and challenging questions were posed. The paper was published at "Design Society".

HCI International 2011 comprise of affiliated Conferences explored a wide variety of state of the art topics which reflect and contribute to a paradigm shift towards ubiquitous interaction, intelligent environments and interactive technologies supporting virtually any aspect of human life and activities in a global and social perspective.

The presented papers on this conference was targeted to different audiences, as one paper was about the overall architecture, the second about the beneficiaries requirement studies and the third about technological aspects and the ontologies used in the project. The presentations of the papers were well visited and many questions were raised. The main questions were about the validity of the results, taxonomy of the ontology of the VUM, and the limitations of the VUM approach. One of the very fruitful discussions took place at session 132, where some participants were very interested in the relation between design patterns/pattern languages and the presentation of design recommendations with the VICON system.

The papers were presented in the following sessions, the number of participants of which were at 20-25 participants/session:

**Tuesday, 12 July 13:30-15:30** Session 047: Universal Access Methods and Tools – Presentation 1 by Markus Modzelewski

**Tuesday, 12 July 16:00-18:00** Session 065: Distributed intelligence and the Web – Presentation 3 by Jaroslav Pullmann

**Wednesday, 13 July 16:00-18:00** Session 132: Capturing and Consolidating Design Knowledge – Presentation 2 by Pierre Kirisci

| 5 | Virtual User Models- Approach and first results of the VICON project | Michael Lawo | eChallenge |  | IEEE |  | 2011 |  | <a href="http://www.echallenges.org/e2011/">http://www.echallenges.org/e2011/</a> | Yes |
|---|--|--------------|------------|--|------|--|------|--|---|-----|

eChallenges is a well established international conference ( [http://www.echallenges.org/e2011/files/e2011\\_FinalProgramme.pdf](http://www.echallenges.org/e2011/files/e2011_FinalProgramme.pdf)) to share success stories and lessons learnt from applied Information and Communications Technology (ICT) related research at European level (FP6 & FP7) as well as Regional, National and Commercial initiatives. International cooperation and discussion of commercialization, exploitation & interoperability issues are key aspects of the programme. The goals of e-2011 are to promote ICT knowledge sharing and innovation between commercial organizations, government agencies and the research community, exchange experiences about the current state of eAdoption at a sectoral, national or regional level and stimulate rapid take-up of Research and Technology Development (RTD) results by industry and in particular SMEs. The paper was presented by Michael Lawo as part of a session on "Applications - intelligent content and semantics" on September, 27<sup>th</sup>, 2011 in Florence. There were about 40 people in this session. There were questions raised concerning the VICON approach allowing to have afterwards further talks on research and exploitation approaches. The presentation resulted in an invitation for 2012 IST-Africa.

## 2.2 List of dissemination activities

| List of dissemination activities   |                                 |             |  |               |  |                               |                  |  |
|--|---------------------------------|-------------|--|---------------|--|-------------------------------|------------------|--|
| No   | Type of activities <sup>3</sup> | Main leader | Title  | Date          | Place  | Type of audience <sup>4</sup> | Size of audience | Countries addressed  |
| 1  | Press release                   | Doro        | Doro announcement of partnership                             | 01/02/2010    |  | Medias                        | --               | SE, DE, TR, IR, GB   |
| International press release announcing the partnership between VICON and Doro. Press release targeting financial market and investors via OMX stock-exchange list for Doros account.   |                                 |             |  |               |  |                               |                  |  |
| 2  | Invited Talk                    | UniHB       | Nutzerschnittstellen für die Zielgruppe der über 70 jährigen | 07-08/05/2010 | eHealth Vienna/Austria<br><a href="http://www.ehealth2011.at">www.ehealth2011.at</a> | Scientists, Public            | >200             | A, CZ, H, SL   |
| The conference's motto and program target on building a bridge from research to application of information and communication technology in health care. Submitted and invited scientific presentations and posters as well as workshops and an interoperability showcase contribute to that. It is an annual conference and the coordinator (Michael Lawo) gave a presentation on the issue of user interface design where the VICON approach and the VUMS cluster activities were presented as a EC funded research activities related to the research done by the coordinator and his team of researchers during previous years. |                                 |             |  |               |  |                               |                  |  |
| 3  | Flyer                           | UniHB       | Project description  | 06/2010       |  |                               | --               | 1000 Flyers printed and distributed at different fairs, conferences, workshops |
| The flyers were distributed to the partners to be used during attended research events (conferences, symposia and workshops) as well as by the industrial partners at fairs, etc.  |                                 |             |  |               |  |                               |                  |  |

<sup>3</sup> A drop down list allows choosing the dissemination activity: publications, conferences, workshops, web, press releases, flyers, articles published in the popular press, videos, media briefings, presentations, exhibitions, thesis, interviews, films, TV clips, posters, Other.

<sup>4</sup> A drop down list allows choosing the type of public: Civil Society, Policy makers, Medias ('multiple choices' is possible).

**List of dissemination activities**

| No   | Type of activities <sup>3</sup> | Main leader | Title   | Date          | Place  | Type of audience <sup>4</sup> | Size of audience | Countries addressed                   |
|--|---------------------------------|-------------|---|---------------|--------|-------------------------------|------------------|---------------------------------------|
| 4  | Presentation                    | UniHB       | Experiences in proposals for the 7th framework programme                          | 02/06/2010    | Bremen | Industry, Public              | >50              | Bremen/Germany                        |
| <p>In the context of this information event entrepreneurs and scientists were informed about the promotion possibilities for research and development projects for the 7th framework programme. The presentation was done by Pierre Kirisci from University of Bremen and was titled "What are the main requirements for launching a successful project?" As a positive example for winning a research project, the VICON project was introduced. Experiences for preparing successful proposals were shared with the audience while several interesting questions were posed to the speakers showing that the audience consisted of experienced and non-experienced audience regarding EU research projects. It became obvious that there are still many SMEs in Germany that have a funding need for research activities, but have only little to none experience of how to apply for an EU project.</p>   |                                 |             |   |               |        |                               |                  |                                       |
| 5  | Invited Talk                    | UniHB       | Wenn die Nutzer älter werden: Herausforderungen an die Entwicklung neuer Produkte | 26/06/2010    | Bremen | Public, Scientists            | >50              | Bremen/Germany                        |
| <p>The invited talk took place in Bremen, GERMANY and was held by Prof. Klaus-Dieter Thoben from the University of Bremen. The overall subject of the event was based upon the theme how new technologies have influenced product development processes in industry during the recent years. Main focus was upon identifying the additional challenges in product development, which may arise through demographic change in many industrialized countries. Prof. Thoben gave a talk about new practices for designing future products for ageing users while considering user needs, thus integrating the requirements of the user in the development process. The talk was in German and the title was: When users get older: challenges for the development of new products. The event had approx. 50 participants while the majority had a non-technical background. As an example the VICON approach was introduced as a product development method where virtual users are used. The challenge was to present the VICON research results in a mainstream compatible way. Source: <a href="http://www.hausderwissenschaft.de/Wenn_Nutzer_aelter_werden.shtml">http://www.hausderwissenschaft.de/Wenn_Nutzer_aelter_werden.shtml</a></p> |                                 |             |   |               |        |                               |                  |                                       |

Exhibitors with our own both to promote fixed line, mobiles and assistive products. This event has been very useful for us to create and maintain good relationship with both interesting partners and also get to know our audience and learn more about their needs. 2010 HIT-messen had 500 participant.s</p>  |                                 |             |  |               |            |                               |                  |                     |
| 8  | Web                             | FIT         | Liaison with the AAL Alliance of the Fraunhofer Society.<br><a href="http://www.aal.fraunhofer.de">www.aal.fraunhofer.de</a> | 04/10/2010    | Internet   | Scientists<br>Public          | >10000           | Germany             |
| <p>The Fraunhofer Network "Ambient Assisted Living" was set up by a group of six Fraunhofer Institutes to market complete solutions in this area. The solutions offered include a variety of functions to improve the user's comfort at home and work, or to facilitate social care at home and in nursing homes, and the provision of mobile services.<br/>Another focus is that of rehabilitation, preventive healthcare, and solutions to preserve the independence of persons requiring medical care, daily assistance, or help to overcome physical disabilities.<br/>The Network pursues an approach based on a common system platform which permits seamless integration of diverse solutions and accommodates the evolution of ambient intelligence (AmI) technologies such as communications, power supplies, sensors and actuators. This approach results in smart products that are mutually compatible, suitable for mobile applications, and can be integrated in other types of network on an ad-hoc basis.<br/>VICON was presented to the AAL alliance and got a dedicated web page for the presentation of VICON on the website of the AAL alliance: <a href="http://aal.fraunhofer.de/projects/VICON.html">http://aal.fraunhofer.de/projects/VICON.html</a></p> |                                 |             |  |               |            |                               |                  |                     |

| <p>With over 30 years of expertise and wide-ranging experience of the market, this fair is an ideal platform for anyone with disabilities, care requirements or chronic conditions as well as for the elderly. The quality and diversity of REHACARE are reflected in numerous „theme parks“, info events, industry representatives, service providers, paying authorities and non-profit exhibitors. Over 700 national and international exhibitors presented a combination of product demonstrations and complex system solutions as well as a wide range of information in the form of special theme parks, seminars and workshops. Year 2010, 52500 visitors came to the show.</p>   |                                 |                |   |               |                       |   |                  |                      |
| 10   | Exhibition                      | Doro           | EUHA  | 13-15/10/2010 | Hannover              | Industry  | >10.000          | Germany              |
| <p>The International EUHA Congress is the annual meeting point of the hearing aid acousticians industry in Germany and it is the leading event of its kind in Europe. In addition to the Congress schedule with its scientific lectures on all aspects of hearing aids and their adaptation, the Industry Exhibition is yet another major part of the event. Doro was there 2010 with our own stand a presenting our assistive devices for hard of hearing.</p>  |                                 |                |   |               |                       |   |                  |                      |
| 11   | Exhibition                      | Doro           | Gitex   | 17-21/10/2010 | Dubai                 | Industry  | >133.000         | Global participation |
| <p>The GITEX is one of the most important trade fairs in the Arab Emirates in the field of electronics. The Arab economy in this sector experiences an economic upturn. The latest developments in the computer market, the visitors at the GITEX look. The exhibitors will showcase their products and innovations. The GITEX exhibition is a trend and is very specialized audience. Conferences and lectures form the framework of the GITEX in Dubai Product focus is on accessories, audio technology, computer games, Computer hardware, Internet service, IT service, laptops, multimedia, network solutions, software, and videos. Over 130 000 visited the Exhibition 2010.</p>   |                                 |                |   |               |                       |   |                  |                      |

| <p>RAatE (<a href="http://www.raate.org.uk/">http://www.raate.org.uk/</a>) is the only UK conference focused on the latest innovations in Assistive Technology. It is a conference of interest to everyone who uses, works with, develops or conducts research on Assistive Technology (AT). The conference program has, over the past years, regularly included new technological developments, service innovations, results of formal research projects, service based research and development and a wide range of other stimulating topics. Thomas Fiddian gave "An Overview Of The VICON Project":<a href="http://www.raate.org.uk/2010/content/view-papers/573/">http://www.raate.org.uk/2010/content/view-papers/573/</a></p> |                                 |                |   |               |                       |   |                  |                      |

| <p><a href="http://veritas-project.eu/2010/09/1st-pan-european-veritas-user-forum-and-workshop-to-take-place-on-28-29-november-2010-in-prague/">http://veritas-project.eu/2010/09/1st-pan-european-veritas-user-forum-and-workshop-to-take-place-on-28-29-november-2010-in-prague/</a> The User Forum brought together the developers and designers and the beneficiaries of the developed products and services. The Workshop was a stage for all involved designers and beneficiaries to discuss their needs with the industry. Already developed virtual user models were discussed. During this event also the 3rd VUMS cluster meeting took place with focus on the standardisation and ethical aspects, faced by the VUMS cluster projects. VICON was presented by Michael Lawo.</p>  |                                 |             |  |               |               |                               |                  |                     |

| <p>CSUN is the world largest Assistive Technology (AT) conference that covers many aspects of AT its use, Web Accessibility and Inclusive Design. [1] Joshue O Connor presented the paper "<b>Future Alternatives to User Testing: Virtual User Modelling in Inclusive Product Design</b>". The paper can be downloaded here. [2] The VICON presentation was scheduled for Friday afternoon and the presentation had 10 or 12 people in attendance, and though it was a small group there was a lot of genuine interest. The presentation lasted for over 30 mins, but after that we all stayed in the room for another 30 mins or so discussing VICON. There were a few academics present and people with a background in user experience and I felt that there was genuine interest in what the VICON project is trying to do. One interesting comment from a software developer with SAS who attended the presentation, was that he was surprised that VICON had come so far already (and was particularly interested in our approach to the RDF schema/predicate models), and was excited about what VICON could achieve.</p> <p>[1] <a href="http://www.csun.edu/cod/conference/program/sessions.php#AGE-3008">http://www.csun.edu/cod/conference/program/sessions.php#AGE-3008</a><br/> [2] <a href="http://www.letsqoexpo.com/event/index.cfm?EID=80000300&amp;p=380&amp;page=scheduledetail&amp;LCID=5027&amp;ECTID=0">http://www.letsqoexpo.com/event/index.cfm?EID=80000300&amp;p=380&amp;page=scheduledetail&amp;LCID=5027&amp;ECTID=0</a></p> |                                 |             |  |               |               |                               |                  |                     |
| 15  | Conference                      | RNID        | TEDx Observer  | 19/03/2011    | London        | Public, Scientific, Industry  | >100             | UK                  |
| <p>An inspirational day of talks, performance and films it featuring speakers drawn from a range of disciplines. RNID was allowed to set up a stall and hand out flyers and speak to delegates on VICON.</p>  |                                 |             |  |               |               |                               |                  |                     |

| <p>The Irish HCI community has continued to grow over the past number of years and has seen much support through the past iHCI conferences, the establishments of the <a href="#">ACM SIGCHI chapter</a> and regular meetings of the <a href="#">Dublin</a>, and more recently, the <a href="#">Limerick Interaction Design Association (IxDA)</a>. [1]<br/>           There were two presentations on the VICON project at the annual iHCI conference as a part of the "Industry Session". There was firstly "The VICON Project " presented by Dr Antoinette Fennell, (NCBI). The presentation was a general overview and introduction of the project. This was followed by a presentation called "Virtual Users in Product Development " by Joshue O Connor, (NCBI) this was a detailed technical overview of how the VUM could conceivably work. [2]<br/>           The conference was well attended and the presentations were before over 50 participants and were well received.<br/>           [1] <a href="http://www.clarity-centre.org/iHCI2010/">http://www.clarity-centre.org/iHCI2010/</a><br/>           [2] <a href="http://www.clarity-centre.org/iHCI2010/program/thursday/">http://www.clarity-centre.org/iHCI2010/program/thursday/</a></p> |                                 |             |  |               |        |  |                  |                     |

### **3 Conclusions and outlook**

As mentioned above, we have followed the strategy to spread our focus to various interested groups, like science, industry, beneficiaries and policy. We will continue our strategy to increase the awareness in all mentioned groups.
